## Stay Ahead of Disruptive Cyber Events

Managers need a deep understanding of the context in which they operate to harness the right tools, strategies, people and training to protect their companies and industries from a constantly changing array of cyber threats.

Salve Regina University's graduate certificate in cyberthreat management and response prepares professionals in all organizations and sectors to actively address issues in this critical field with relevant and applicable knowledge and skills. By focusing on current conceptual and practical aspects of cybersecurity and domestic and international terrorism, this program equips you to stay ahead of changing trends and challenges.

As practitioners with longtime experience in their profession, our faculty are experts in their craft.

## Who Will Benefit?

Salve Regina's graduate certificate in cyberthreat management and response is designed for professionals who hold a bachelor's or master's degree and are seeking professional development in topics crucial to today's technological environment. Students in good academic standing who would like to continue their studies may apply to the M.S. in criminal justice and cybersecurity program and carry the credits forward.

- Business operations managers
- Cybersecurity professionals
- Defense contractors
- Government officials and town managers
- Insurance risk managers
- Law enforcement leadership
- Product engineers
- Senior executives in for-profit enterprises and nonprofit organizations
