

The Academic Hood

Wearing The Hood

1

Place the hood over your head with the velvet side up, with the V-shaped end in front of your neck and the long U-shaped draping over your shoulders and back.

2

The long portion of the shell should rest against your back with the chevron lining pattern facing out, making the colors visible.

3

If the hood has a loop at the base of the v-shaped end, then attach the loop to a button or the sipper of the gown to prevent the hood from moving

4

Smooth out the hood and ask for help adjusting the placement if needed.
