Lead in a Rapidly Changing Environment

Rapid advances in technology are driving significant change in the intelligence profession. Salve Regina University's graduate certificate in intelligence and analysis tradecraft prepares professionals in all organizations and sectors to actively address issues in this critical field with relevant and applicable knowledge and skills.

Our four-course certificate focuses on the conceptual and practical aspects necessary to perform intelligence work at the local, state or federal level, internationally or in the private sector. The program uses case studies and intelligence community standards to develop students' abilities to collect, critically analyze and document information to maximize its value to intelligence consumers and decision makers.

Courses are taught by seasoned professionals who are experts in their field. Instructors work closely with students to meet their individual needs while serving as career-focused mentors, helping students build their professional network.

Who Will Benefit?

Salve Regina's graduate certificate in intelligence and analysis tradecraft is designed for professionals who hold a bachelor's or master's degree and are seeking professional development in topics crucial to today's technological environment. Students in good academic standing who would like to continue their studies may apply to the M.S. in criminal justice and cybersecurity program and carry the credits forward.
