A COMMUNITY ON A MISSION

Here at Salve, you'll be part of a community known for its hospitality and dedication to our mercy-inspired mission, which is built on the belief that the power to create positive change and impactful outcomes belongs to every one of us. Founded by the Sisters of Mercy, we are guided by their enduring vision of working toward a world that is harmonious, just and merciful.

With our coastal Rhode Island campus as the backdrop, your Salve experience will lead to the extraordinary as you explore the limitless possibilities that your future holds.

The Salve Compass

From the day you arrive to the day you graduate, you will chart your course from college to career through the Salve Compass program. Build your personalized program of study, develop critical skills for success, and discover the transformative power of experiential learning with a team of faculty, staff and advisors to guide you along the way.

As a mercy institution, we emphasize the Critical Concerns highlighted by the Sisters of Mercy and look for solutions to issues that affect us all as global citizens.

Five Critical Concerns

- Anti-racism
- Earth
- Immigration
- Non-violence
- Women

GIARRATANI-CHANDLER**

*Major: Marketing
Minor: Business Administration*

*Resident Advisor / Intercultural
Competence Development Program
Participant / Member of the Leadership
Scholars Program, Black Student Union
and Multicultural Student Organization*

“I think I settled into college life pretty easily. People would check in and give me information, but at the same time, they’d give me space to do things on my own. In college, you’re here to be on your own, and you don’t want to feel that you constantly have someone looking over your shoulder. As an RA (resident advisor), I want to be there to make sure students have as little problems as possible. I want them to view me as an example of what being a student at Salve is – someone they can go to as a peer and a friend who gives you guidance.”

Foundation

When you arrive at Salve, you arrive at your new home away from home. You'll discover how the Salve and Newport communities are connected to each other – and to your success.

YOUR SUCCESS TEAM AWAITS

We have a dedicated staff for support each step of the way. In your First Year Studio you will create a roadmap to the future, known to Salve students as an Odyssey plan, with people dedicated to ensuring that you achieve your goals and live your best life – here at Salve and well beyond.

Guidance is easy to find in our newly renovated Compass Center for Advising, Career and Life Design on the first floor of McKillop Library, a hub for student support and exploration.

SOPHIA CARGES

Major: Psychology

*Female Empowerment Club President /
Member of the Mad Batter Baking Club,
Psychology Club and SRYou Planning
Committee*

"My First Year Studio, which met once per week with a Compass Advisor and an upperclass mentor, was a big part of my success in my first semester. We knew we could trust Natalie to give us real answers to whatever questions we had. She always made herself accessible, and at every class we asked her about something we'd been wondering during the week. Natalie quickly became more of a friend than a mentor."

NATALIE COTE

*Majors: Literature, Secondary Education
Minor: Creative Writing*

*Peer Mentor / SRYou Chair / Member of
the Leadership Scholars Program*

"I think the first year should be more about exploration, and I tried a whole bunch of new things that year. It was in my sophomore year that I put down roots. As an education major, I knew I wanted to work with first year students; I wanted to be someone they can come to if they need something. In each class, I tried to create a cohesive environment where they could share what they were doing and what they wanted to accomplish. We had lots of collaboration and communication. I believe it's important to include students in their learning process in order to create trust and create a bond."

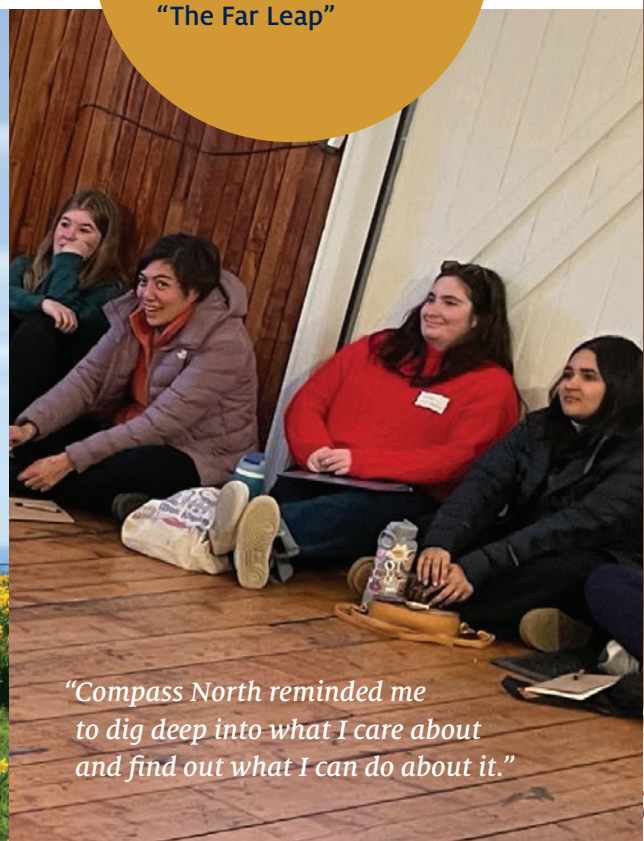

Foundation

MY THREE SALVES

Using a Life Design model centered on our Compass values such as a rigorous transformative education, adaptive resilience, compassionate mercy leadership and an inclusive community, students are guided to an understanding of purpose. Salve students envision the future by creating three versions of what success means for them.

Life Design Model
My Three Salves

“The Current Plan”
“The Alternate Ending”
“The Far Leap”

“Compass North reminded me to dig deep into what I care about and find out what I can do about it.”

TIME FOR REFLECTION

Intentional, developmental and distinctly Salve, elements like “Compass North” provide students with opportunities to further connect with each other and develop plans to take full advantage of their college education.

EMMET SCHUELE

Major: Accounting

Minor: Data Analytics

*Varsity Soccer Player / Member of
the Leadership Scholars Program*

“I had never met a lot of the people who were at the Compass North retreat, so it was a good experience for me. We were all willing to learn and grow from the experience, the group activities were beneficial, and everyone participated. One thing we talked about was something we thought didn’t go well for us, and we found other people who had similar struggles in their first semester. Talking to them was nice to learn from their experiences, as well. Having people available to talk to about what I want to do going forward is really nice – whether it be my advisor, or professors, or upperclassmen. I now have many people who I can talk to. With my major, I have something that I know I enjoy and want to do; I think that’s really important to find that community, drive and sense of purpose in your schoolwork.”

Exploration

WORKSHOP FOR SUCCESS

Explore your strengths, develop the skills required for personal and professional success, and discover ways in which you can address the challenges facing our world. Designed to develop career readiness competencies and prepare students for their Compass Summer experience, Sophomore Studio is a conference style workshop that allows students to explore the diversity of career and life paths available.

97%

OMAR KAZIZ

*Major: Global Studies
Minors: Entrepreneurship,
Political Science*

“Sophomore Studio is so valuable because it opens your eyes to things that you really need to know about, and it does so at just the right stage of your professional development. When you come to Salve, you aren’t just getting the education to find a great career, but also the hands-on experience to prepare you to search for that career – and excel in it.”

Exploration

COMPASS SUMMER

The Salve Compass has developed a unique way to help our students build the skills employers are seeking, develop expertise in tackling the critical concerns facing our world, and connect students more deeply to the cultural, historic and environmental richness of Newport.

The Compass Summer caps off the sophomore year with a one- or two-week immersive group project. Students select experiences that pique their interest, allowing them to explore a new area or expand on their established academic journey.

Lexi Callaghan

Majors: Dance, Biology

Program: Jazz Dance in Newport led by Dr. Lindsay Guarino

"While being in the program, I was able to make connections with every single person in my jazz dance community. We all actively and equally participated in understanding the importance of learning and listening from direct sources of the work we do in the classroom. Our program addresses anti-racism and women, and our main goal is to acknowledge that jazz dance is a Black American art form that should be respected and represented. We were taken to the Newport Jazz Festival to feel the music and connect to it on a personal level and try to understand our place in the work of social justice."

Samantha Mansolf

Major: Studio Art, Graphic Design and Photography Concentrations

Minor: Sports Management

Program: Historical and Modern Sports of Newport led by Adam Witham and Teresa Starzecki

“The sports industry is hard work but very rewarding – I enjoyed learning about the analytic side of sports and can see myself pursuing something in that field. I think experiencing Newport in the summer opened my eyes to the opportunities on the island, such as internships and specialty jobs. I gained meaningful experiences that can be translated into my career as well as on my campus involvement with athletics, connected with the professors who led the program, and got to know people I wouldn’t have met otherwise.”

John Pelrine

Major: Cultural and Historic Preservation

Program: Archaeology and Preservation in Rhode Island led by Dr. Heather Rockwell

“The highlight of the program in my opinion was having an archaeological dig at the Rham House in nearby Bristol, as I have always wanted to be an archaeologist — and this was the first time I felt I was actually doing archaeological work by myself with my peers, which was tons of fun. I also am much more well-rounded and have a better understanding for my future classes. The amount of hands-on experience I received during the program gave me a window as to how my career would be if I continued in this field of work.”

Sofia Abuin

Major: Psychology

Program: Sustainable Earth Program with Newport Community School led by Dr. Paula Martasian and Kelly Powers

“While this program was aligned with my major and minor, it was interesting to work with elementary students in an outdoor setting and learn much more about environmentalism. On campus, I built connections with my student volunteers and different organizations, which helped facilitate all of the activities we ran, including tours in the Hydroponics Lab and The Arboretum. We encouraged the kids to do hands-on gardening and cleaning of natural spaces around the community.”

Immersion

COMPASS VITAE

Take what you've learned and go deeper through hands-on learning opportunities that allow you to put your development into practice. Salve students gain experience and effect change through internships, fieldwork, community service, study abroad, and the many ways in which they partner with local, regional and national businesses and organizations.

The Compass program brought to life.

GLOBAL PERSPECTIVE

Learning and living through the lens of an ever-expanding world view is what Salve students do best. Whether by attending on-campus lectures and activities such as the twice-yearly Multicultural Education Week or by studying abroad through one of our many international program partnerships, students become part of something bigger by connecting with others and discovering who they are and who they want to be.

200 study abroad programs
in 45 countries

LEVI MITCHELL

Major: Environmental Studies

Minors: History, Economics

Intern, NASA DEVELOP Program

Throughout his four years at Salve, Levi has worked in reforestation and wildfire firefighting, attended the 2023 United Nations Climate Change Conference in the United Arab Emirates, held leadership roles in student organizations on campus and played on Salve's men's ice hockey team. During his senior year he also served as an intern with NASA's DEVELOP program, conducting studies on seasonal ice formation changes in Alaska, where he and his team utilized remote sensing technology, spatial data and ledgers to aid in ecological conservation efforts.

"Working with advanced technology in this great program to conduct research has the same output effect as my other jobs where you're benefiting a community," said Levi. "With NASA, I get to take my experiences a bit farther and see what those further applications can be."

Integration

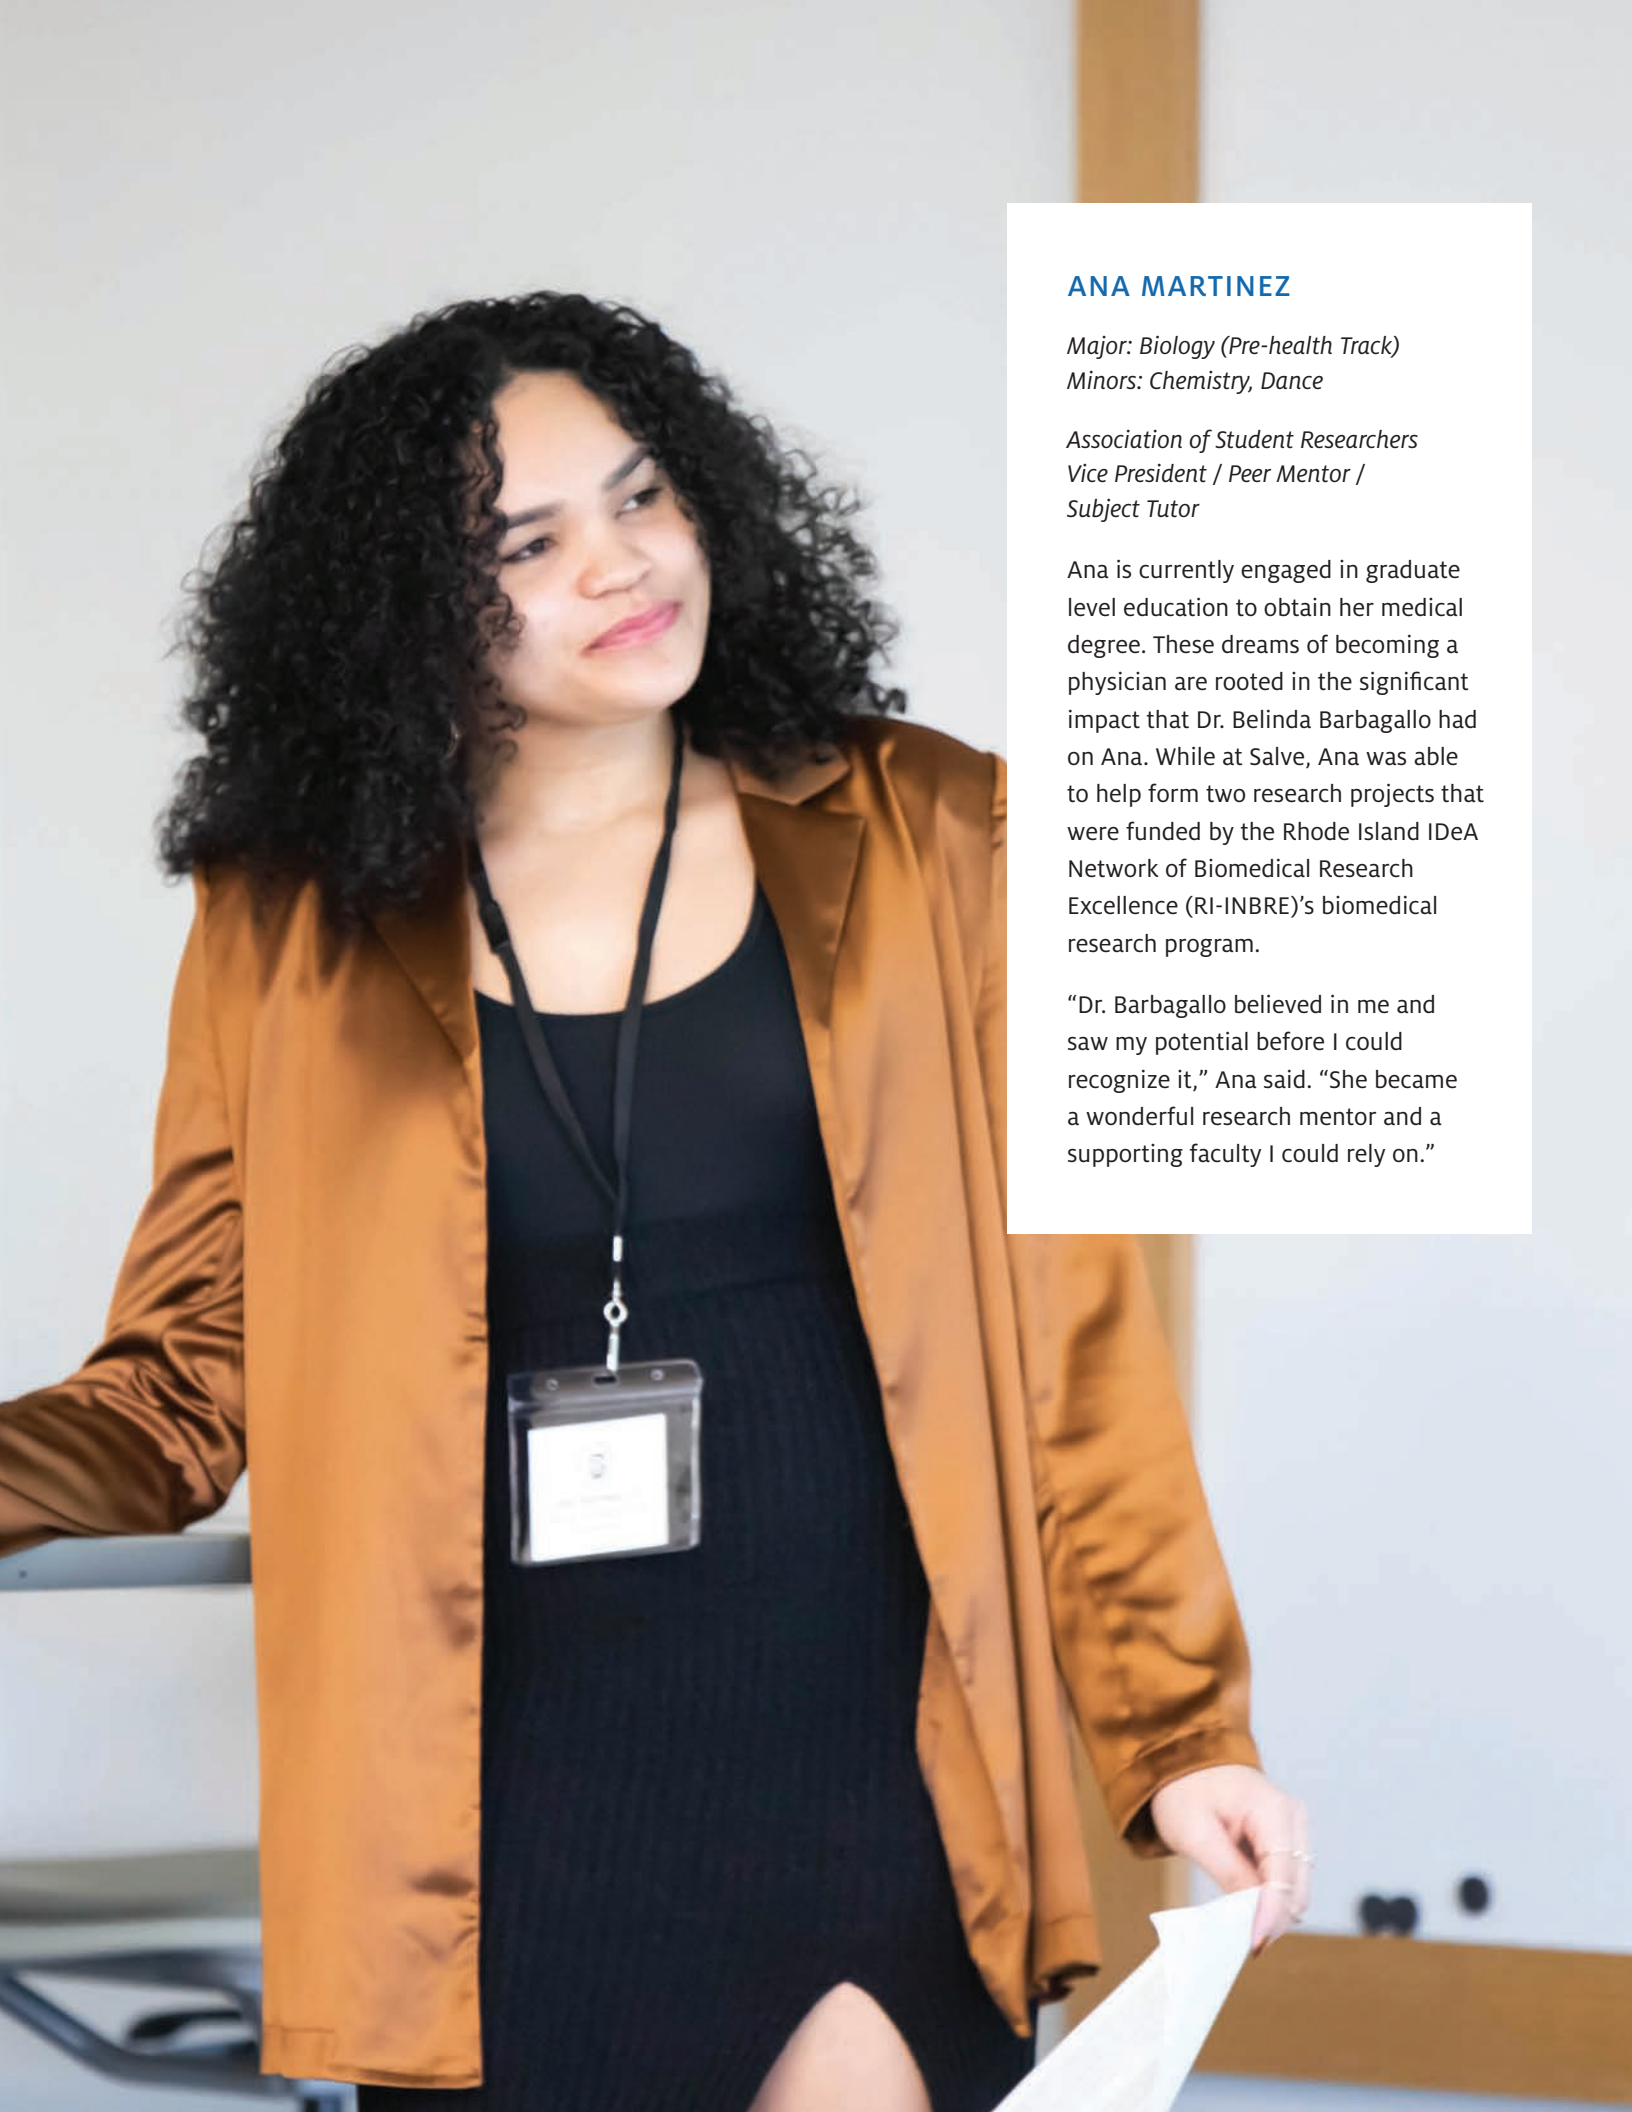

WELCOME TO THE ULTIMATE CELEBRATION

Salve students have developed the necessary tools and opportunities for their futures – the Compass Summit is the time to celebrate all that has been accomplished. From experiences in our innovative Center for Business Outreach, the Pell Center for International Relations and Public Policy, state-of-the-art studios and laboratories, and our one-of-a-kind location in a community that attracts visitors from across the globe, our students are ready to share their Salve story.

FACULTY THAT INSPIRE AND PROFESSIONAL CONNECTIONS THAT LEAD TO OPPORTUNITY

At Salve, students have the possibility to have an impact on their community and career as the Compass learning integrates their post-graduate preparation. Through research opportunities, presentations and networking, Salve students are uniquely prepared to answer the call of what the world needs. We know this is true – because they're already doing it.

ANA MARTINEZ

*Major: Biology (Pre-health Track)
Minors: Chemistry, Dance*

*Association of Student Researchers
Vice President / Peer Mentor /
Subject Tutor*

Ana is currently engaged in graduate level education to obtain her medical degree. These dreams of becoming a physician are rooted in the significant impact that Dr. Belinda Barbagallo had on Ana. While at Salve, Ana was able to help form two research projects that were funded by the Rhode Island IDEa Network of Biomedical Research Excellence (RI-INBRE)'s biomedical research program.

"Dr. Barbagallo believed in me and saw my potential before I could recognize it," Ana said. "She became a wonderful research mentor and a supporting faculty I could rely on."

Unlock an Unforgettable Campus Experience

There are seldom times in life when you will have so many chances to express yourself, pursue your passions and discover something new. Your years at Salve are one of those times.

Indulge your passions
and interests in
our vibrant student
organizations.

Serve populations
in need throughout
Rhode Island
and across the globe.

Find your voice
and your purpose in
communities for all identities,
faiths and cultures.

Salve offers abundant opportunities to hold leadership roles, volunteer where your gifts matter and build friendships that last a lifetime. Here, you'll find an inclusive and collaborative campus environment where you are seen and valued, where every action and interaction inspire growth.

Seahawk Spirit

Whether you compete for one of our 20 NCAA Division III varsity teams, participate in club and intramural sports or cheer from the sidelines, becoming a Seahawk means joining a community dedicated to collective success. As a member of the New England Women's and Men's Athletic Conference (NEWMAC), Salve is aligned with premier institutions that champion academic and athletic excellence.

BRANDON GROVER

Major: Business Administration

Minor: Data Analytics

Varsity Baseball Team Captain /

member of the Student-Athlete Advisory Committee

"You can really tell that there is a special culture being built here. Salve Athletics does a great job in promoting a balance between academic and athletic success. You are challenged every day to be better than you were the day before. It is not only going to help you be successful now but is vital to future success after Salve."

As baseball captain, Brandon led the Seahawks to the DIII College World Series following a record season for wins.

Newport's Classic Coast Inspires Academic Excellence and Community Impact

With a bustling downtown and stunning ocean views, Newport is a popular vacation destination for millions of visitors from around the world. But this resort community is more than just a pretty face. Our location connects students more deeply to the cultural, historic and environmental richness of Newport and Aquidneck Island through experiential learning, service projects and internships.

“At Salve,

our success
by the impact
that our alumni
have on their
communities
and the world.”

President
Kelli J. Armstrong

Tallya Maciel '23
Biology Major
Neuroscience and Chemistry Minors

As an undergraduate and first-generation college student, Tallya co-founded the Association of Student Researchers, which enabled her to share her passion and inspire other students from across disciplines to explore opportunities for research. Now a research technician at Dana Farber Cancer Institute in Boston, Tallya is in the lab every day and credits Salve for helping her land the position. “You make such amazing connections at Salve. **When I got my diploma, I knew that I had used every single ounce of opportunity.**”

Jordan Elster '19
Business Administration Major

Jordan’s gift for connecting with people serves him well in his role as associate development director at Innovation Studio in Boston. He began his work in the startup community while at Salve by helping launch Innovate Newport; his latest project is working to create a directory of startup resources students can tap into in Boston, Rhode Island and New York City.

“Salve Regina University, and especially the faculty in the business department, played a pivotal role in nurturing my entrepreneurial spirit, helping guide me to where I am today. The internship course I took during my senior year paved the way to my present job, allowing me to continue contributing to the startup ecosystem. **I am a firm believer in the idea that your network is your net worth,** a belief that started during my time at Salve, where I began forging many valuable connections.”

Jackie O'Connor '18, '21 (MBA)

Marketing Major
Business Administration Minor

Inspired by her love of celebrations, Jackie started Bellevue Boards in 2021, a business that offers fresh cheese and charcuterie boards, picnic boxes and grazing tables. **The values of Salve's mercy-inspired mission echo throughout her business, emphasizing compassion as a small-business owner within Newport's tight-knit community.**

"I think the mission is so community-oriented, and I personally believe that a business does best when it's more humanized. The values that I have as a human and what I learned from Salve can also apply to the rules of my business as there has to be some flexibility in this life and business to help others and serve my community."

Ciara Speller '16

Communications Major
Dance Minor

A storyteller at heart, Ciara's career in broadcast journalism has taken her from "man on the street" interviews on Salve's campus to senior evening news anchor for WWLP-22 News in Springfield, Massachusetts. "At a young age **I knew that I wanted to be a voice for those without**, through the field of journalism. Salve provided me with the unique tools and skill-sets that I needed to discover my creative talents and prepared me to be an outstanding advocate and journalist. Looking forward, I hope to continue to have the privilege to be a role model and inspire those around me to strive for excellence in whatever career path that they choose."

Anthony Azzano '23

Psychology Major
Economics Minor

As an undergraduate student, Anthony created the mental health initiative "Salve Hockey Mental Health Night," raising over \$10,000 for mental health awareness.

Now, as a financial advisor associate with Carney Peterson Wealth Management Group, Anthony finds his experience at Salve working with mental health to be an important asset in his field.

"Salve helped me build a skill set that I could place into any professional role. I learned how to communicate with others in a way that's altruistic – **it's important to show people that they're being taken care of**, so having that prior experience was huge for me."

Jeremy Ventura '13, '14 (M)

Field CISO, Myriad360
Criminal Justice and Criminology Major

Multiple internships propelled Jeremy to an accomplished career in cybersecurity, where he specializes in advising organizations on information security best practices. **“Salve set me up for success by building practical experience via internships.** I had the opportunity to intern for Raytheon’s cybersecurity unit, which added tremendous value, both technical and non-technical, to my resume. I was fortunate to get a full-time job offer with a consulting company two months before I even graduated.”

An industry leader who is regularly featured in media, blog posts, podcasts and speaking events, Jeremy attributes his achievements to intensive networking. “Invest in yourself by building relationships. Make the most of connecting with your professors and staff, because you never know where your path will lead in the future. Remember, it’s not who you know, it’s who knows you.”

Ciara Marro-Wilson '23

Biochemistry Major 3+3 PharmD Program

“During my first-year at Salve, I remember getting the notification that Salve had just developed the 3+3 program with Saint Joseph’s – and I was so excited. I always think of it as fate that Salve developed this program, because if they didn’t – I wouldn’t be here right now. I am now in my second year as a Doctor of Pharmacy candidate at Saint Joseph’s, and the youngest in my class. I think being younger gives me an advantage, as completing pharmacy school in six years is pretty unique, and **the structure and pace of 3+3 program has shown me that I can complete any challenge I set my mind to.** The skills I have learned at Salve have helped me to excel and be comfortable in new environments like this.”

Being a supportive community is something that Salve Regina prides itself on – and that starts from day one. Here, we work with you every step of the way to make attending Salve your reality. We encourage students to interact with their admissions and financial aid counselors. Think of this support as a long-term relationship.

99% of students receive aid from Salve, helping to make your education an even better value.

Applying to Salve

Salve is a member of the Common Application and we use a holistic approach in the review process. SAT/ACT tests are optional but the following items are required to complete an application:

- Common Application and fee (\$50)
- Official high school transcript
- Two letters of recommendation

Additionally, for select applicants

- Audition required for dance, music and theatre in acting and musical theatre concentrations (see salve.edu/artsscholar)
- Portfolio required for studio art and technical theatre concentration
- Evidence of English proficiency for non-native speakers (TOEFL, IELTS or Duolingo tests)
- Curriculum information and/or portfolio of work required for homeschooled candidates
- Official college transcript and college report required for transfer students (learn more at salve.edu/transfer)
