A First-of-Its-Kind Program in Clinical Leadership

Salve Regina University's post-master's certificate in clinical leadership in behavior analysis will help you expand your expertise and prepare for leadership roles within clinical organizations. This first-of-its-kind program is designed for working professionals and is delivered online through a blend of synchronous and asynchronous learning, allowing you to continue uninterrupted in your current position while preparing for future development.

Through focused coursework in leadership and management, compliance and ethical oversight, strategic planning, systems and operations, quality practices, training and enablement, clinical supervision and development, and innovation and dissemination, this program will give you the tool set you need to successfully assume leadership positions in behavior-analytic organizations and guide them to improved practices and operations.

As you progress through the program, you will explore the nuances and complexities of leading multifaceted clinical organizations, with instructors who are industry leaders in their domains and peers who share your goal of preparing themselves for leadership.

Dr. Cody Morris

Director and associate professor, Department of Psychology

"The profession of behavior analysis has rapidly expanded in recent years, creating incredible opportunities for BCBAs to quickly assume leadership roles in organizations. The catch is that most of the BCBAs who get leadership opportunities have not received training in the skills necessary to take on those types of responsibilities. This post-master's in clinical leadership in behavior analysis was designed to address that issue by helping BCBAs develop the skills they will need to thrive in essential leadership positions in clinical organizations."

THE SALVE DIFFERENCE

Meet Our Experts

Learn from leaders who are shaping the future of behavior analysis. Our internationally respected faculty bring their research, clinical experience, and specialized knowledge directly into the classroom. Each course is taught by a faculty member whose expertise closely aligns with the subject, giving you direct access to experts who are advancing the areas you're studying.
